### Streamlining cross-sectoral policy framework throughout the extractive lifecycle in environmentally protected areas (CSA)

HORIZON-CL4-2022-RESILIENCE-01-03

"Projects are expected to contribute to the following outcomes:

- a. Exchange of good practices in permitting procedures related to extractive activities that may have an impact in environmentally protected areas;
- b. Dissemination and exploitation of projects outputs is tailored for competent EU, national and regional authorities, industry and civil society in EU Member States."

System-oriented approach

# **Preliminary findings**

- The distance of the stakeholder to the planned mine site directly influences the degree of its rejection or acceptance.
- Environmental groups find themselves trapped in contradictions: advocating decarbonisation, while opposing mining and rejecting global south extractivism, yet also resisting domestic mining.
- Politicians often exploit communities' fear of change for their own gain in the political arena.
- Rural populations express disillusionment with the trajectory of Europe's development.

## New business models

## **Invisible mines**
